

China Paper Industry Report 2008 Is Ready Now!

Despite the global financial crisis, China produced nearly 80million metric tons of paper and board in 2008, realizing an increase of 8.57%. From 2000 to 2008, the annual growth rate of China's paper and paperboard production was averaged at 12.78%, exerting an ever growing influence on global paper, pulp and recovered paper market in periods of economic uncertainties.

The 30-page report released by China Paper Association analyzes the paper industry's performance, details industry structure, evaluates market share, presents historical data for the years 2000-2008 and illustrates by figures and graphics such sections as production-consumption, key industry indicators, pulp production-consumption, imports-exports, consolidation, equity structure, production-sales of top-30 Chinese companies and environmental protection.
