

China Paper Industry Report 2009 Is Ready Now!

Despite the global financial crisis, China produced over 86million metric tons of paper and board in 2009, realizing a year over year increase of 8.27%. At an average annual growth rate above 12% between 2000 and 2009, China's paper industry played an ever growing role on global paper, pulp and recovered paper market in periods of economic uncertainties.

The 30-page report released by China Paper Association analyzes the paper industry's performance, details industry structure, evaluates market share, presents historical data for the years 2000-2009 and illustrates by figures and graphics such sections as production-consumption, key industry indicators, pulp production-consumption, imports-exports, consolidation, equity structure, production-sales of top-30 Chinese companies and environmental protection.

PacificNet Holding Corporation – the authorized translator and publisher of the report – offers its electronic version to worldwide subscribers. To order, please contact:
